Ask For Output In JSON Or CSV

Structured output is useful for spreadsheets, imports, and automation.

Best way to use it:

â€¢ Define fields.

â€¢ Ask for valid format only.

â€¢ Validate before importing.

Copy-ready prompt:

Return the result as CSV with columns: [columns]. Do not include commentary outside the CSV.

Quality check:

â€¢ Columns are correct.

â€¢ No extra prose is included.

â€¢ Values are clean enough to import.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
