Ask For Privacy Review

Before sharing sensitive data, ask what should be removed or anonymized.

Best way to use it:

â€¢ Describe data.

â€¢ Ask for redaction categories.

â€¢ Do not paste secrets unnecessarily.

Copy-ready prompt:

Review this data description and tell me what to remove, anonymize, or generalize before using it in an AI prompt: [description].

Quality check:

â€¢ Secrets are identified.

â€¢ Personal data is protected.

â€¢ Useful context remains.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
