Create Learning Plans

ChatGPT can turn a goal into a structured path.

Best way to use it:

â€¢ State current level.

â€¢ Define target skill.

â€¢ Ask for milestones and exercises.

Copy-ready prompt:

Create a 30-day learning plan for [skill]. My current level is [level]. Include daily practice, checkpoints, and project ideas.

Quality check:

â€¢ Plan fits your level.

â€¢ Exercises are concrete.

â€¢ Progress can be measured.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
