Debug Your Thinking

ChatGPT can help test assumptions in your own reasoning.

Best way to use it:

â€¢ State your conclusion.

â€¢ List assumptions.

â€¢ Ask for counterarguments.

Copy-ready prompt:

Here is my conclusion: [conclusion]. Find hidden assumptions, counterarguments, missing evidence, and conditions where I would be wrong.

Quality check:

â€¢ Assumptions are named.

â€¢ Counterarguments are serious.

â€¢ Evidence gaps are clear.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
