ChatGPT Tip: Generate Regex Carefully

ChatGPT Tips | Jun 04, 2026

Regex needs examples and counterexamples.

Article

Generate Regex Carefully

Regex needs examples and counterexamples.

Best way to use it:

â€¢ Provide matching examples.

â€¢ Provide non-matching examples.

â€¢ Ask for explanation and tests.

Copy-ready prompt:

Create a regex for [task]. It should match: [examples]. It should not match: [counterexamples]. Explain it and provide test cases.

Quality check:

â€¢ Examples pass.

â€¢ Counterexamples fail.

â€¢ Escaping fits your language.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
