Make Better Decisions With Premortems

A premortem imagines failure before it happens.

Best way to use it:

â€¢ Describe plan.

â€¢ Ask why it failed.

â€¢ Turn failures into safeguards.

Copy-ready prompt:

Run a premortem for this plan: [plan]. Imagine it failed in 6 months. List causes, warning signs, and prevention steps.

Quality check:

â€¢ Failure modes are plausible.

â€¢ Warning signs are measurable.

â€¢ Prevention steps are actionable.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
