ChatGPT Tip: Separate Public And Private Context

ChatGPT Tips | Jun 18, 2026

Do not mix confidential facts with public-facing content generation.

Article

Separate Public And Private Context

Do not mix confidential facts with public-facing content generation.

Best way to use it:

â€ Label private inputs.

â€ Ask for public-safe output.

â€ Request removed details list.

Copy-ready prompt:

Use the private context below to create a public-safe version. Do not reveal confidential details. List what you omitted and why. Context: [context].

Quality check:

â€ Confidential details are omitted.

â€ Public version is useful.

â€ Omissions are listed.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
