Use ChatGPT To Compare Learning Resources

Choose courses/books/videos based on goals and constraints.

Best way to use it:

â€¢ List options.

â€¢ Define goal and level.

â€¢ Ask for recommendation and sequence.

Copy-ready prompt:

Compare these learning resources for my goal: [resources]. My level is [level]. Recommend order, what to skip, and practice projects.

Quality check:

â€¢ Recommendation fits level.

â€¢ Practice is included.

â€¢ Skips are justified.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
