Use ChatGPT To Review Pull Requests

AI review is useful when it focuses on risks and missing tests.

Best way to use it:

â€¢ Paste diff or summary.

â€¢ Ask for findings first.

â€¢ Request severity and file references.

Copy-ready prompt:

Review this diff like a senior engineer. Lead with bugs, regressions, security risks, and missing tests. Keep style comments secondary: [diff].

Quality check:

â€¢ Findings are prioritized.

â€¢ References are concrete.

â€¢ Style does not dominate.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
