Use Deep Research For Complex Reports

Deep Research is better for multi-source research than a quick answer.

Best way to use it:

â€¢ Use it for broad questions.

â€¢ Ask for citations and comparison.

â€¢ Review the report before acting.

Copy-ready prompt:

Run deep research on [topic]. Produce an executive summary, evidence table, tradeoffs, recommendations, and unresolved questions.

Quality check:

â€¢ The report cites sources.

â€¢ Recommendations follow evidence.

â€¢ You verify critical claims.

DropTicks note:

Use ChatGPT like a workstation, not a magic answer box. Give it the role, goal, input material, constraints, expected output format, and review criteria. The stronger your workflow, the better the result.
