Claude Code /claude-api Skill

Claude Skill

Bundled Claude API skill for working with Claude API patterns, request design, and integration implementation.

Builder notes

Purpose

â€¢ Bundled Claude API skill for working with Claude API patterns, request design, and integration implementation.

Recommended SKILL.md contents

â€¢ Trigger description explaining when Claude should use the skill.

â€¢ Step-by-step procedure for the workflow.

â€¢ Required checks before edits or publication.

â€¢ Verification command or manual acceptance checklist.

â€¢ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

â€¢ Use this skill because it reduces repeated API integration instructions for teams building on Claude.

â€¢ Skills load their full instructions only when used, which keeps normal session context smaller.

â€¢ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

â€¢ AI engineers, backend teams, product engineers, and platform teams integrating Claude APIs.

â€¢ Teams standardizing AI-assisted delivery across multiple repositories.

â€¢ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

â€¢ API-key handling knowledge, target use case, model selection criteria, and expected response shape.

â€¢ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.

â€¢ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

â€¢ Claude API access, network connectivity, secure environment variables, and project

runtime for API calls.

• Claude Code skill support and access to the files or commands the workflow needs.

• Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
