Claude Code /run-skill-generator

Claude Skill

Bundled generator skill that records how to launch a project and saves it as a project-specific run recipe.

Builder notes

Purpose

â€¢ Bundled generator skill that records how to launch a project and saves it as a project-specific run recipe.

Recommended SKILL.md contents

â€¢ Trigger description explaining when Claude should use the skill.

â€¢ Step-by-step procedure for the workflow.

â€¢ Required checks before edits or publication.

â€¢ Verification command or manual acceptance checklist.

â€¢ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

â€¢ Use this skill because it prevents agents from rediscovering complex launch commands on every session.

â€¢ Skills load their full instructions only when used, which keeps normal session context smaller.

â€¢ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

â€¢ teams with Laravel, Node, Python, mobile, containerized, or multi-service projects.

â€¢ Teams standardizing AI-assisted delivery across multiple repositories.

â€¢ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

â€¢ a project that can run locally and enough access to install dependencies and confirm the launch path.

â€¢ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.

â€¢ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

â€¢ Claude Code v2.1.145 or later and permission to create '.claude/skills/run-/' in the project.

â€¢ Claude Code skill support and access to the files or commands the workflow needs.
â€¢ Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
