Claude Skill: Deploy Checklist

Claude Skill

Task skill pattern for production deploys with explicit test, build, migration, cache, and rollback steps.

Builder notes

Purpose

â€¢ Task skill pattern for production deploys with explicit test, build, migration, cache, and rollback steps.

Recommended SKILL.md contents

â€¢ Trigger description explaining when Claude should use the skill.

â€¢ Step-by-step procedure for the workflow.

â€¢ Required checks before edits or publication.

â€¢ Verification command or manual acceptance checklist.

â€¢ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

â€¢ Use this skill because it keeps deployment repeatable and reduces skipped release checks.

â€¢ Skills load their full instructions only when used, which keeps normal session context smaller.

â€¢ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

â€¢ DevOps engineers, Laravel teams, SaaS founders, and release managers.

â€¢ Teams standardizing AI-assisted delivery across multiple repositories.

â€¢ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

â€¢ known deployment target, environment variables, migration policy, smoke tests, and rollback plan.

â€¢ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.

â€¢ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

â€¢ project-specific deploy commands, server access policy, CI/CD credentials if used, and guarded tool permissions.

â€¢ Claude Code skill support and access to the files or commands the workflow needs.
â€¢ Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
