Claude Skill: Mobile Release QA

Claude Skill

Skill for mobile app pre-release checks covering permissions, offline behavior, API errors, auth, performance, and store readiness.

Builder notes

Purpose

â€¢ Skill for mobile app pre-release checks covering permissions, offline behavior, API errors, auth, performance, and store readiness.

Recommended SKILL.md contents

- â€¢ Trigger description explaining when Claude should use the skill.
- â€¢ Step-by-step procedure for the workflow.
- â€¢ Required checks before edits or publication.
- â€¢ Verification command or manual acceptance checklist.
- â€¢ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

- â€¢ Use this skill because it makes mobile validation systematic before TestFlight, Play Console, or production release.
- â€¢ Skills load their full instructions only when used, which keeps normal session context smaller.
- â€¢ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

- â€¢ Flutter, React Native, iOS, Android, and QA teams.
- â€¢ Teams standardizing AI-assisted delivery across multiple repositories.
- â€¢ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

- â€¢ target platforms, release build steps, device matrix, API dependencies, and acceptance flows.
- â€¢ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.
- â€¢ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

- â€¢ mobile SDK/toolchain, simulator or device access, build credentials, and release checklist.

â€¢ Claude Code skill support and access to the files or commands the workflow needs.
â€¢ Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
