Claude Skill: RAG Quality Audit

Claude Skill

Skill for inspecting retrieval sources, chunking, embedding choices, citation behavior, recall, and hallucination risks.

Builder notes

Purpose

â€¢ Skill for inspecting retrieval sources, chunking, embedding choices, citation behavior, recall, and hallucination risks.

Recommended SKILL.md contents

â€¢ Trigger description explaining when Claude should use the skill.

â€¢ Step-by-step procedure for the workflow.

â€¢ Required checks before edits or publication.

â€¢ Verification command or manual acceptance checklist.

â€¢ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

â€¢ Use this skill because it makes document QA measurable before RAG systems are exposed to users.

â€¢ Skills load their full instructions only when used, which keeps normal session context smaller.

â€¢ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

â€¢ AI engineers, data teams, knowledge-base owners, and enterprise AI builders.

â€¢ Teams standardizing AI-assisted delivery across multiple repositories.

â€¢ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

â€¢ sample questions, source documents, retrieval logs, expected citations, and failure examples.

â€¢ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.

â€¢ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

â€¢ access to retrieval pipeline files, vector store configuration, eval data, and document privacy rules.

â€¢ Claude Code skill support and access to the files or commands the workflow needs.
â€¢ Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
