Claude Skill: Security Review

Claude Skill

Skill for auth, authorization, secrets, file uploads, SSRF, injection, rate limits, logging, and dependency risk review.

Builder notes

Purpose

â€ Skill for auth, authorization, secrets, file uploads, SSRF, injection, rate limits, logging, and dependency risk review.

Recommended SKILL.md contents

â€ Trigger description explaining when Claude should use the skill.

â€ Step-by-step procedure for the workflow.

â€ Required checks before edits or publication.

â€ Verification command or manual acceptance checklist.

â€ Links to supporting examples, scripts, or templates when the workflow needs them.

Why use this

â€ Use this skill because it adds a structured security pass before shipping risky backend or AI features.

â€ Skills load their full instructions only when used, which keeps normal session context smaller.

â€ A reusable 'SKILL.md' gives teams a versioned workflow instead of repeated ad hoc prompts.

Who can use this

â€ security-conscious engineering teams, backend developers, and platform owners.

â€ Teams standardizing AI-assisted delivery across multiple repositories.

â€ Builders who want Claude to apply consistent procedures without repasting instructions.

Prerequisites

â€ clear threat model, changed files, auth rules, data sensitivity, and deployment environment.

â€ A skill directory such as '.claude/skills//SKILL.md' or '~/claude/skills//SKILL.md'.

â€ A concise frontmatter description so Claude can decide when to load the skill.

System requirements

â€ repository access, dependency manifests, security policy references, and safe permission to inspect config files.

â€¢ Claude Code skill support and access to the files or commands the workflow needs.
â€¢ Any external APIs, MCP servers, credentials, or local runtimes required by the specific workflow.
