

DropTicks AI Resource

Claude Skills Pattern

Claude Skill

A resource category for reusable AI skills, workflows, and instruction packages.

Builder notes

Use this type to collect reusable skill patterns that help teams package repeatable AI work.

Why use this

â€¢ Use this when you want to package repeatable AI work into reusable instructions, files, workflows, and team-ready operating patterns.

Who can use this

â€¢ AI workflow designers, engineering teams, documentation teams, operators, and builders creating repeatable agent or assistant behavior.

Prerequisites

â€¢ Clear workflow definition, source files or examples, and an understanding of how the target assistant or coding agent consumes instructions.

System requirements

â€¢ A compatible AI assistant or coding-agent environment, access to the project files, and any connector or MCP server required by the workflow.
