

DropTicks AI Resource

Hugging Face Models and Datasets Hub

Hugging Face LLM

Major hub for discovering open models, datasets, spaces, embeddings, and AI research artifacts.

Builder notes

Use for researching open model options, dataset availability, embedding models, small model deployment, and community benchmarks.

Why use this

â€¢ Use this to compare models, datasets, embeddings, demos, and open AI artifacts before choosing a production or research direction.

Who can use this

â€¢ AI engineers, ML researchers, product builders, data teams, and founders evaluating open model or dataset options.

Prerequisites

â€¢ Basic understanding of model cards, dataset licenses, benchmark limitations, inference tradeoffs, and privacy constraints.

System requirements

â€¢ A browser for research. For local use, requirements depend on the model or dataset size and may include Python, transformers-compatible tooling, GPU memory, disk space, or a hosted inference provider.
